Specialising in
**Paediatric & Adult
General orthopaedics**

Consulting from
**North Adelaide
Murray Bridge**

Associate Professor Peter Cundy is an Orthopaedic Surgeon with over 25 years' experience treating all forms of paediatric and adult orthopaedic conditions and injuries. He practises both privately, at Orthopaedics SA (North Adelaide), and publicly, at the Women's and Children's Hospital (also in North Adelaide), where he has headed the Department of Orthopaedic Surgery since 2005.

After completing his original medical and surgical training in Adelaide in 1980, Associate Professor Cundy undertook a Paediatric Orthopaedic Fellowship at Massachusetts General Hospital (Harvard Medical School, USA). He returned to Adelaide, in 1989, and joined the Women's and Children's Hospital as a Senior Visiting Medical Officer in Orthopaedic Surgery and has since held many senior positions including President of the Australian Paediatric Orthopaedic Society and Chairman of Orthopaedics SA.

In addition to his practice, Associate Professor Cundy has developed broad experience supporting surgery, developing standards of excellence, and sharing and promoting research in his field of speciality. He was an Examiner in Orthopaedic Surgery for the Royal Australasian College of Surgeons (2003-2012) and is on the editorial boards of several, major peer-reviewed paediatric orthopaedic journals in Europe and the United States. He is also a board member of MIGA, a leading medical defence insurer in Australia.

About Orthopaedics SA

The 22 specialists of Orthopaedics SA represent the largest private orthopaedic group in South Australia, providing expert medical care for patients of all ages. We treat bone and joint problems relating to arthritis, degenerative conditions, sports injuries, trauma, fractures and genetics.

Should a patient require surgery, we tailor our evidence based approach to each individual. Our surgeons are leaders in joint replacement and arthritis surgery, as well as innovators in minimally-invasive and arthroscopic surgery.
