Specialising in
Upper limb
Sports injury
Joint replacement surgery
Shoulder, hip and knee surgery

Consulting from
Bedford Park
North Adelaide
Elizabeth Vale

Dr Meng Ling is an Orthopaedic Surgeon with a principal interest in upper limb pathology, sports injury and joint replacement, particularly shoulder reconstruction and replacement, and that of the hip and knee. He brings a wealth of experience to Orthopaedics SA, having completed his upper limb fellowship in Canada, focussing on shoulder replacement, as well as visiting internationally respected surgeons in North America to explore arthroscopic, sports injury and knee surgery. He has broad experience in adult trauma surgery.

With Orthopaedics SA, Dr Ling consults privately at Memorial Hospital, Flinders Private Hospital and Central Districts Hospital. He is also active in the public system, serving as a Visiting Medical Specialist with the Southern Adelaide Health Service and operating at Noarlunga Hospital, Flinders Medical Centre and the Repatriation General Hospital. Dr Ling works in upper limb and sports injury at both facilities, while at the Repatriation General Hospital, he also deals with joint replacement. To support regional patients, Dr Ling visits regional Australia, which includes consulting and operating at Portland District Hospital, Victoria.

With his initial medical training undertaken at Flinders University (Adelaide) in 1996, Dr Ling became a Fellow at the Royal Australasian College of Surgeons in 2007. Following this, he completed a Clinical Fellowship in Upper Limb Surgery at the Department of Orthopaedic Surgery, Queens University (Ontario, Canada). In 2012, Dr Ling became Fellow of the Australian Orthopaedic Association and was appointed to the Court of Examiners of the Royal Australasian College of Surgeons in 2015 for the Specialty Court of Orthopaedics Surgery.

About Orthopaedics SA

The 22 specialists of Orthopaedics SA represent the largest private orthopaedic group in South Australia, providing expert medical care for patients of all ages. We treat bone and joint problems relating to arthritis, degenerative conditions, sports injuries, trauma, fractures and genetics.

Should a patient require surgery, we tailor our evidence based approach to each individual. Our surgeons are leaders in joint replacement and arthritis surgery, as well as innovators in minimally-invasive and arthroscopic surgery.
